

*Mission*

*VISUEL EXTREME*

*2008*

*VTC*

*St Véran*

*Nicolas CHAMBINAUD - Yannick PENSEC*

*Guillaume ROUTEAU - Pierre STROCK*

*Cyril VIGNEAU - Serge VIEILLARD*

## Programme :

- 58 nébuleuses planétaires

## Bilan :

- 44 cibles observées
- 24 nébuleuses dessinées
- 60 dessins

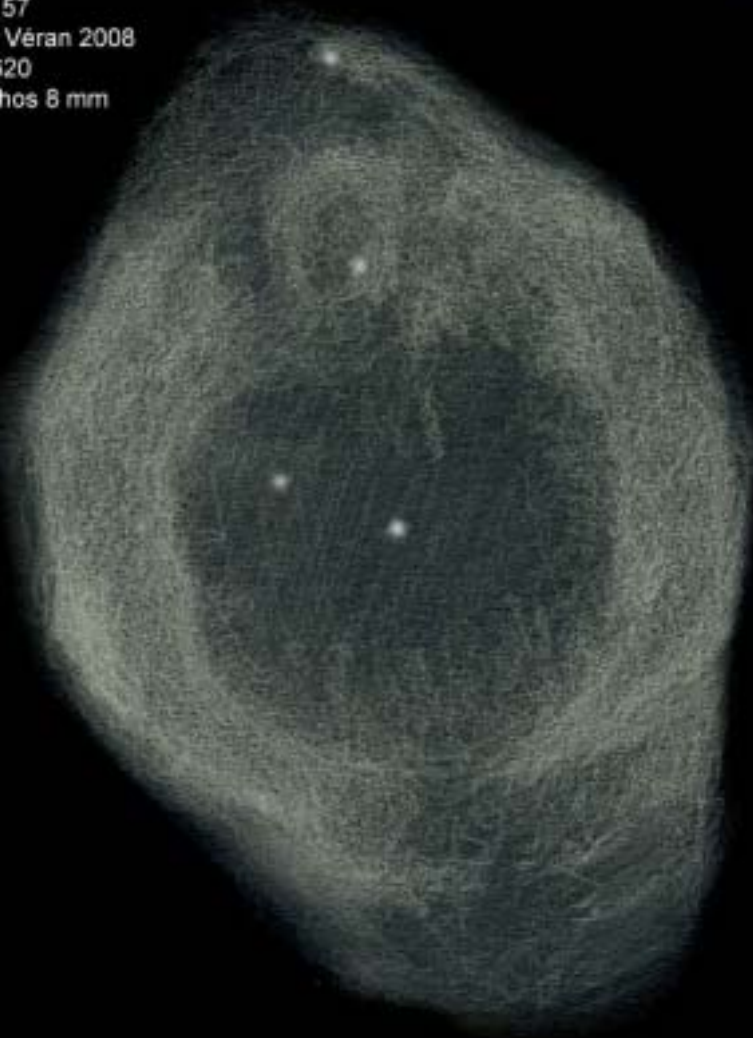

# Le matériel :

- Nagler 31 mm, 290x
- Nagler 17 mm, 500x
- Ethos 13 mm, 700x
- Ethos 8 mm, 1100x,
- Nagler 4,8 mm, 1900x...
- ... filtres OIII, UHC-S

# Comment ?

- Affutez les crayons !!!!
- Une gomme
- Du bô papier
- Une lampe rouge.....

..... Et

Des Travaux !!!!!!!

- des accessoires dédiés au visuel : oculaires, renvoi coudé, porte oculaire, réducteur de focale, etc...
- la câblerie du télescope, l'outillage spécifique d'électricité,
- un ring bien étroit, un escalier périlleux, un « bel » escabeau d'observation,
- le port du casque est vivement recommandé,
- un pilotage bien lointain,
- et.... Une optique à collimater, peaufiner, nettoyer, des procédures, des outils...

**HOU-HOUU!**
